

Let MedCore™ Jump Start Your A/R.

Early Out Service

When It Comes To A/R Outsourcing, Timing Is Everything.

With patient financial responsibilities growing daily throughout the healthcare industry, it's more important than ever for providers to get patients on an acceptable payment schedule quickly. Left to their own devices, patients often "wait and see" what their insurance will pay, then trickle out payments as they see fit, if at all.

MedCore's Early Out service is designed to engage patients earlier in the A/R cycle, during that optimal 30 to 90 day post discharge window of opportunity, and encourage them to resolve their bill or set up payment arrangements under a plan supported by the provider.

A Member of The SSI Group of Companies

You Don't Have To Staff Up To Bring A/R Days Down.

By all outward appearances, MedCore's experienced staff is your staff. Ever mindful that your community image is at stake, our approach is always courteous and consultative. Accessing your patient accounting system in the same manner your on-site staff does, we thoroughly investigate all attempts and obstacles that have caused the bill to remain unpaid. Often our staff will discover issues that have not been previously discussed with the patient that quickly turn into resolutions. This includes the patient having a secondary insurance carrier or eligibility for retroactive benefits.

Deploying tools for eligibility verification, accessing the National Change of Address (NCOA) database, obtaining social security confirmation through Accurint®, and establishing propensity to pay through Equifax® and TransUnion®, we are well informed of your patients' circumstances and can maximize our efforts accordingly. We also employ a team of information systems experts who work with your team to quickly begin our recovery process. In fact, our records show revenue begins to flow to your office within two weeks of implementation.

MedCore Advantages

- Focusing exclusively on healthcare A/R
- HIPAA trained and Red Flag Rule knowledgeable
- Staff has an average of 16+ years industry-specific experience
- Accepts virtually any form of payment (credit cards, debit cards, checks, money orders)
